

LG Partnership

Commercial Digital Signage

LG have more than 222,000 employees worldwide and work closely with international subsidiaries to ensure we can meet demand.

Fleetmark and LG are fully aware of the potential scale of this project, and the expectations of KFC. LG can provide enough displays to supply all screens for all KFC restaurants across Australia within 12 weeks if required. However, we understand it is more likely to be a rollout over the next 4 years.

LG Service in Australia stock all spare parts locally to meet our warranty responsibilities. This means that our service time frames are very reasonable and our 5 year warranty offering ensures a complete screen swap should anything go wrong.

In short, Fleetmark and LG are very well equipped and the most qualified brand to meet KFC's national requirements.
